

Tree Plantation and Observation

at

The College Campus

Organized by

NCC Unit

Sri Ramkrishna Sarada Vidyamathapitha

A tree plantation event was held on 4th December, 2020 at the college campus to promoting environmental sustainability and creating a healthier campus environment. This event was organized by **NCC unit of Sri Ramkrishna Sarada Vidyamathapitha.**

The tree plantation event had clear aims and objectives centered around fostering environmental awareness among students and stakeholders of the institution. It aimed to impart knowledge about sustainable practices, teaching the youth how to contribute to a greener world. Through this initiative, participants learned to develop a deep-rooted affection for trees and nature, nurturing a sense of camaraderie and care for the environment as a whole. The event saw the active involvement of 42 participants who collectively planted 120 trees, symbolizing their commitment to a healthier planet and a brighter future.

The tree plantation program yielded significant outcomes, notably by raising ecological awareness among its participants. By actively engaging in the process of planting and nurturing trees, the program effectively contributed to the cause of saving and safeguarding the environment. The act of planting trees not only symbolized a commitment to environmental preservation but also directly contributed to it, as each tree plays a role in absorbing carbon dioxide and producing oxygen. The initiative exemplified how collective efforts can have a positive impact on the environment, fostering a sense of responsibility and action in the quest for a greener and healthier planet.
